Read the text to answer question number 1 – 4.

In life, humans need to learn social skills, one of which is non-verbal communication, such as smiling when greeting others, making eye contact in conversation, and maintaining confident body language. During the course of learning social skills, not only do we learn to practice them, but most of us become at some level of fluency in interpreting other people's non-verbal communications.

Non-verbal communication, or what is also called a person's signal or body language, is how others perceive you and how you understand others through their own non-verbal messages. It is not an exact science, since there's plenty of ambiguity in how you might interpret someone's signal versus how another person might. It often depends on your own experiences and relationships with the communicator. The same can happen to you when you're the communicator, of course.

Non-verbal communication is important in human's life. "if you want to influence people in a positive way, then your attitude and how you are perceived using non-verbal communication is very important," says Mi Ridell, an expert in body language. Annemieke Meurs-Karels, a non-verbal communication expert based in the Netherlands, says people often react more to what you do than what you say, because it communicates the underlying message, what you really think and feel, and your intentions."

Source: BBC, 2022

1. Based on the text, what factors that can affect interpretation of someone's non-verbal communication?
 - A. Your personal emotions and relationships to the communicator
 - B. Relationships you have with the communicators' relatives and friends
 - C. How you greet and make eye contact with the listeners
 - D. Your manner and how you come across through verbal communication
 - E. Your personal relationships and experiences with the speaker
2. Which of the following statements is CORRECT about non-verbal communication?
 - A. Non-verbal communication and someone's gestures or body language are two different things
 - B. There is a lot of certainty in how you interpret someone's non-verbal signals
 - C. Non-verbal communication is how others perceive you and how you understand other through their own non-verbal messages
 - D. The attitude and how you are perceived using non-verbal communication are not important to influence people
 - E. Verbal communication includes greeting others with a smile and maintaining eye contact during conversations
3. Which of the following statements best expresses the information in the underlined sentence in the first paragraph?
 - A. While learning social skills, we are only learning to practice them, so most of us are not fluent in interpreting other people's non-verbal communication.
 - B. The majority of us are not skilled at interpreting non-verbal cues from other people because we are only learning to practise social skills.
 - C. Not only do we learn how to use social skills, but the majority of us also develop the fluency in interpreting non-verbal signals from others.
 - D. While learning social skills, not only do we learn to put them into practice, but most of us remain fluent in interpreting other people's non-verbal communication.

TO #4 Alphastude

Literasi Bahasa Inggris

- E. Not only do we learn how to practice social skills in daily life, but the majority of us are still proficient at interpreting non-verbal signals from others.
- 4. What can be concluded from paragraph 3?
 - A. Humans need to learn social skills because they need to interpret other people's non-verbal communication.
 - B. Non-verbal communication is about how others perceive you and how you understand others.
 - C. Non-verbal communication is important in human life because people often react more to what someone does than what someone says.
 - D. Interpretation often depends on your own experiences and relationships with the communicator.
 - E. There's plenty of ambiguity in how you might interpret someone's signal versus how another person might.

Read the text to answer question number 5 – 8.

Brain changes in autism are comprehensive throughout the cerebral cortex rather than just particular areas thought to affect social behavior and language, according to a new UCLA-led study that significantly refines scientists' understanding of how autism spectrum disorder (ASD) progresses at the molecular level. The study, published today in *Nature*, represents a comprehensive effort to characterize ASD at the molecular level. While neurological disorders like Alzheimer's disease or Parkinson's disease have well-defined pathologies, autism and other psychiatric disorders have had a lack of defining pathology, making it difficult to develop more effective treatments.

The new study finds brain-wide changes in virtually all of the 11 cortical regions analyzed, regardless of whether they are higher critical association regions – those involved in functions such as reasoning, language, social cognition and mental flexibility – or primary sensory regions. "this work represents the culmination of more than a decade to perform such a comprehensive analysis of the autism brain," said study author Dr. Daniel Geschwind. "we now finally are beginning to get a picture of the state of the brain, at the molecular level, of the brain in individuals who had a diagnosis of autism. This provides us with a molecular pathology, which similar to other brain disorders such as Parkinson's, Alzheimer's and stroke, provides a key starting point for understanding the disorder's mechanism, which will inform and accelerate development of disease-altering therapies."

For the new study, researchers examined gene expression in 11 cortical regions by sequencing RNA from each of the four main cortical lobes. They compared brain tissue samples obtained after death from 112 people with ASD against healthy brain tissue. While each profiled cortical region showed changes, the largest drop off in gene levels were in the visual cortex and the parietal cortex, which processes information like touch, pain and temperature. The researchers said this may reflect the sensory hypersensitivity that is frequently reported in people with ASD. Researchers found strong evidence that the genetic risk for autism is enriched in a specific neuronal module that has lower expression across the brain, indicating that RNA changes in the brain are likely the cause of ASD rather than a result of the disorder.

Source: University of California "Brain changes in autism are far more sweeping than previously known, study finds: The study is the most comprehensive effort yet to study how autism affects the brain at the molecular level." ScienceDaily, 2022.

- 5. According to the passage, what actions can researchers take after this?
 - A. Conduct further research that can support the characterization of ASD, namely cellular pathology.

TO #4 Alphastude

Literasi Bahasa Inggris

- B. Determine whether researchers can use a computational approach to develop therapies based on reversing the changes in gene expression that researchers have found in ASD.
 - C. Examines how accurately the nerves present in ASD can process information such as touch, pain, and temperature.
 - D. Create a table that contains a database related to differences in Alzheimer's and Parkinson's disease compared to ASD sufferers.
 - E. Publishing research in the hope that other researchers will continue research on ASD and find effective treatments for Alzheimer's and Parkinson's.
6. Which of the following statements is NOT TRUE based on the passage above?
- A. A comprehensive effort has been made to describe ASD at the molecular level in the study, which was published today in Nature.
 - B. The new study discovers brain-wide changes in nearly all of the 11 cortical regions examined.
 - C. The presence of molecular pathology makes Parkinson's disease or Alzheimer's disease treatment equivalent to ASD.
 - D. This work is the result of more than a decade's worth of labor by numerous lab members, which was required to conduct such an in-depth examination of the autism brain.
 - E. In the new study, RNA from each of the four primary cortical lobes was sequenced to examine gene expression in 11 cortical regions.
7. Which of the following statements best expresses the information in the underlined sentence in paragraph 2?
- A. Precisely all of the 11 cortical regions examined in the new study showed changes.
 - B. Below all of the 11 cortical regions examined in the new study showed changes.
 - C. The new study found changes throughout the brain in nearly all of the 11 cortical regions analyzed. Attentive of whether they were higher critical association areas.
 - D. Previous research discovered changes in nearly all of the 11 cortical regions examined.
 - E. Whether they were higher critical association areas or primary sensory areas, the new study found changes in nearly all of the 11 cortical regions examined.
8. In presenting the ideas, the writer starts by?
- A. There are new study findings that contradict previous scientific understanding.
 - B. There are new study findings which state that they are related to the comprehensive efforts made by previous researchers.
 - C. There are new study findings which state that Alzheimer's or Parkinson's disease already has an effective treatment.
 - D. The discovery of new studies that enhance the understanding of previous scientists.
 - E. There is a new study finding that states the emergency of ADS must be addressed immediately by finding molecular pathology.

Read the text to answer question number 9 – 12.

Employers and workers alike are trained to point out their technical skills and personal accomplishments on their resumes, and then talk about them in job interviews. However, to succeed at work, whether personally or as part of a team, an entirely different set of skills will emerge. One of them is what we know as emotional intelligence.

TO #4 Alphastude

Literasi Bahasa Inggris

Therefore, nowadays leaders are also looking for job candidates with good 'emotional intelligence. The competency includes in it are our ability to understand and manage out own feelings and those of others, and then use this knowledge to build positive and productive relationships. Working in an emotionally intelligent way may mean taking a different approach. Instead of putting your head down and prioritizing to-do lists or productivity goals, put human relationships and our own and others' feeling first.

This mindset may be a challenging mindset transition, but the benefits can be immense, increasing morale, productivity, well-being, and personal impact more than ever. Amy Bradley, and adjunct professor of management and leadership said, "work gets done through people, and if you're unable to work with your own and other's emotions, It becomes very difficult to get things done." How you deal with conflict and setbacks, how you encourage people when they're down, your ability to negotiate or get things done, all of those things touch an emotional intelligence.

Source: BBC, 2022

9. Based on the text, what is the priority when working in an emotionally intelligent way?
 - A. Prioritizing human relationships and our own and other's feelings.
 - B. Prioritizing to-do lists or productivity goals.
 - C. Prioritizing to put your head down while communicating with others.
 - D. Prioritizing to deal with conflict and setbacks.
 - E. Prioritizing to increase the morale, productivity, well-being, and personal impact.
10. Based on the text, which of the following statements is CORRECT about emotional intelligence?
 - A. Emotional intelligence includes the capacity to comprehend and control both our own and other people's feelings.
 - B. Leaders nowadays do not seek individuals for jobs who have great emotional intelligence.
 - C. To be hired, each employee needs acquire a high level of emotional intelligence.
 - D. Emotional intelligence brings great benefits such as increasing corporate profits and productivity.
 - E. All of the employees should have a good emotional intelligence in order to get a job.
11. Which of the following statements best expresses the information in the underlined sentence in paragraph 3?
 - A. Don't rely too heavily on our emotions at work because people are a crucial component of completing a work.
 - B. People are the medium whereby is work is completed and if you are unable to manage your own and other's feelings, achieving your goals will become very challenging.
 - C. Work can be completed through people without having to consider our own or their feelings.
 - D. Even though a task can accomplished without people, their emotions cannot be ignored when accomplishing it.
 - E. people's feelings cannot be ruled out when completing a job even though the work can be completed without people.
12. How was paragraph 2 related to paragraph 1?
 - A. Paragraph 2 provides expert opinion regarding the emotional intelligence described in paragraph 1.
 - B. Paragraph 2 contradicts the information about emotional intelligence that has been explained in paragraph 1.

TO #4 Alphastude

Literasi Bahasa Inggris

- C. Paragraph 2 provides further explanation about emotional intelligence which is discussed in paragraph 1.
- D. Paragraph 2 provides research evidence about emotional intelligence that has been explained in paragraph 1.
- E. Paragraph 2 and paragraph 1 are not related in terms of information relations.

Read the text to answer question number 13 – 16.

Finding women's sports to get easier. The first-ever network to focus on female athletes, the Women's Sports Network, launched Wednesday, offering 24/7 streaming of original programming, competitions, documentaries and a daily studio show "Game On." The Women's Sports Network is a free, ad-supported network featured on streaming services including Amazon.com's Freevee, Fox Corp-owned Tubi, FuboTV and smart TVs. The new network comes at a time when investment and viewership numbers for women's sports are on the rise, yet women only receive a small fraction of media coverage. "it's a significant step towards narrowing the gap in media coverage for female athletes, for female sports," said Angela Ruggiero, CEO and co-founder of Sports Innovation Lab and four-time ice hockey Olympian, who is on the board of advisors for the new network. The network was first announced back in February by Los Angeles-based Fast Studios.

"2022 has been a significant year. We've looked back to commemorate the 50th anniversary of Title IX, but I think what Women's Sports Network shows ... there's a real focus on what the next 50 years are going to look like," said Jon Patricof, CEO and co-founder of women's sports league network Athletes Unlimited. The Women's Sports Network has partnerships with the Women's National Basketball Association, Women's Football Alliance, Ladies Professional Golf Association, U.S. Ski and Snowboard, Sports Innovation Lab and World Surf League, among others. It plans to broadcast games starting in January. Fast Studios was founded in 2020 by long-time ad executive Stuart McLean with a focus on ad-supported streaming television services. Fast Studios has also launched streaming networks focused on auto racing and spartan obstacle course competitions. This past year has seen a steady rise in viewership numbers for women's sports. The WNBA postseason saw a 22% increase in viewership year over year. Female athletes at the collegiate level are also proving to be winners in the NIL era, garnering deals with brands including Nike now that college athletes can be paid for their name, image and likeness.

Yet women's sports receive only 5% of media coverage, according to a recent study by the University of Southern California and Purdue University. "The Women's Sports Network is exactly what athletes, fans and sponsors have been asking for," Mollie Marcoux Samaan, commissioner of the Ladies Professional Golf Association, said in a release announcing the network launch. According to a study conducted by the National Research Group and Ampere Analysis, 39% of Gen Zers are watching more women's sports than they were a year ago, along with 29% of millennials. But the study found that the hurdles remain high: 79% of U.S. sports fans still claim to not actively follow women's sports. Meanwhile, 74% of fans cannot name a single corporate sponsor of any major women's league. "There's a pent-up demand for women's sports, but women's sports typically go under-invested, under-supported, under-viewed, because the ecosystem underneath it hasn't really been built," Ruggiero said.

Source: CNBC, 2022

13. Refer to the passage, why is the existence of female's sports media needed?
- A. Because 74% of fans cannot name a single corporate sponsor of any major women's league.
 - B. Because women athletes receive a big fraction of media coverage.
 - C. Because it's a significant step forwards narrowing the gap in media coverage for female sports.
 - D. Because 79% of U.S. sports fans still claim to not actively follow women's sports.

TO #4 Alphastude

Literasi Bahasa Inggris

- E. Because 39% of Gen Zers are watching more women's sports than they were a year ago.
14. Which one is the incorrect statement based on paragraph 3?
- A. Women's sports receive only 5% of media coverage.
 - B. 29% of millennials are watching more women's sports than they were a year ago.
 - C. Women's sports typically go under-invested, under-supported, and under-viewed.
 - D. There's a pent-up demand for women's sports.
 - E. The women's Sports Network is exactly what athletes and investors have asked for.
15. The word steady in paragraph 2 has the same meaning with...
- A. Loose.
 - B. Stable.
 - C. Faint.
 - D. Strong.
 - E. Slight.
16. The underlined word in paragraph 2 refers to?
- A. Women's National Basketball Association.
 - B. Women's Football Alliance.
 - C. Ladies Professional Golf Association.
 - D. The Women's Sports Network.
 - E. Sports Innovation Lab.

Read the text to answer question number 17 – 20.

Iran has pushed back against efforts spearheaded by Western countries to scrutinise at the United Nations its handling of weeks of protests across the country. Germany and Iceland said on Friday they submitted a request on behalf of 42 countries to hold a special session of the UN Human Rights Council later this month on the continuing demonstrations in Iran – which would signal the first time such a meeting is being convened on Iran. The request calls for the session to “address the deteriorating human rights situation in the Islamic Republic of Iran, especially with respect to women and children”, and has the support of more than one-third of the council's voting members, which is required to convene a gathering outside the body's normal schedule. The protests began in mid-September after the death in police custody of Mahsa Amini, a 22-year-old woman arrested by the country's “morality police” for allegedly wearing her hijab improperly.

Dozens of people are thought to have been killed during the protests with many more arrested, but Iranian officials have not released an official tally. They have, however, said more than 40 security forces have been killed, and began holding fast-tracked courts for “leaders of riots” who could be sentenced to execution. A group of UN experts, including the special rapporteur on the situation of human rights in Iran, Javād Rehmān, on Friday released a statement calling on Iranian authorities to stop indicting people with charges punishable by death for participating in the protests. Rights groups have condemned Iran for its response to the demonstrations amid severe restrictions on internet connectivity. The United States and the European Union, in addition to Canada and the United Kingdom, have imposed human rights sanctions on Iranian officials and entities, which Tehran has responded to with sanctions of its own.

Iran has called into question Western governments' credibility in scrutinising Tehran's behaviour. In a phone call on Thursday with UN Secretary-General Antonio Guterres, Iran's foreign minister Hossein Amirabdollahian said a Human Rights Council meeting would be held by Western governments “who propagate violence and

TO #4 Alphastude

Literasi Bahasa Inggris

terror". "[It's] not about the Islamic Republic of Iran, which is a true defender of human rights and has shown deep restraint during recent riots," said Amirabdollahian. The diplomat "warned" Guterres that convening a council meeting would constitute a "political move" that would adversely affect Iran's relations with the West. Iran also sent two representatives to New York City to participate in a number of UN human rights events to convey what it called a "correct narrative" of what is happening in the country – which officials refer to as "riots". Kazem Gharibabadi, the deputy for international affairs of the Iranian judiciary who is in New York with conservative politician Zohreh Elahian, said they aim to "prevent the incorrect and hostile narrative of Western countries and the US". Iran has repeatedly blamed the US, Israel, the UK and Saudi Arabia for "inciting terror and riots" across the country and being the driving force behind the protests.

Source: Al Jazeera, 2022

17. According to this passage, what makes Germany and Iceland submitted a request to hold a special session of the UN Human Rights Council?
 - A. Because Iran committed human rights violations in Germany and Iceland.
 - B. Iran commits human rights violations in 42 countries around the world.
 - C. They want to address the importance of human rights in Iran.
 - D. Because there are massive demonstrations in Iran.
 - E. They want to address the deteriorating human rights situation in the Islamic Republic of Iran.
18. Which is the correct statement based on paragraph 2?
 - A. Dozens of people are thought to have been killed during the protests in Iran.
 - B. Iran authorities said more than 40 security forces have been injured.
 - C. The United States and Then United Nations have imposed human right sanctions to Iran.
 - D. Iranian officials have released an official tally of the victims of the demonstrations.
 - E. Iran began holding fast-tracked courts for "leaders of riots" who could be sentenced to life.
19. What is the main idea of paragraph 3?
 - A. Iran and the UN work together to solve the human rights problem in Iran.
 - B. Iran is furious that the Western government is interfering in its domestic affairs.
 - C. Iran questions the credibility of Western governments in examining Tehran's behavior.
 - D. Iran called Western countries as "who propagate violence and terror".
 - E. Iran suspects Western countries involvement in demonstrations in its country.
20. Which parties Iran has repeatedly blamed for "inciting terror and riots" across the country?
 - (1) The United States
 - (2) The United Nations
 - (3) Saudi Arabia
 - (4) Germany
 - (5) Iceland
 - A. 1 and 2
 - B. 1 and 3
 - C. 2 and 3
 - D. 3 and 4
 - E. 4 and 5

Literasi Bahasa Inggris

Kunci Jawaban + Pembahasan.

1. E.

Pembahasan:

JAWABAN : E

Informasi tentang hal yang dapat mempengaruhi interpretasi terhadap komunikasi non verbal seseorang ada pada paragraf kedua kalimat kedua dan ketiga. Pada kalimat tersebut dijelaskan bahwa, "Ada banyak ambiguitas dalam cara Anda menginterpretasikan sinyal seseorang. Seringkali tergantung pada pengalaman dan hubungan Anda sendiri dengan komunikator."

Maka, pilihan yang mengandung jawaban yang tepat adalah E. Pilihan A tidak tepat karena emosi pribadi (*personal emotions*) tidak dijelaskan pada teks. Pilihan B tidak tepat karena hubungan dengan keluarga pembicara (*communicators family*) tidak dijelaskan pada teks. Pilihan C tidak tepat karena cara bersikap terhadap pendengar (*listeners*) tidak dijelaskan pada teks. Pilihan D tidak tepat karena komunikasi verbal tidak dijelaskan pada teks.

2. C.

Pembahasan:

JAWABAN : C

Pilihan A tidak tepat karena komunikasi non verbal dan isyarat atau bahasa tubuh seseorang adalah dua hal yang sama. Pilihan B tidak tepat karena seharusnya ada banyak ambiguitas (*ambiguity*) bukan kepastian (*certainty*). Pilihan D tidak tepat karena seharusnya hal tersebut penting (*important*). Pilihan E tidak tepat karena hal yang disebutkan termasuk ke dalam komunikasi non verbal bukannya verbal.

3. C.

Pembahasan:

JAWABAN : C

Kalimat yang bergaris bawah bermakna bahwa selama mempelajari keterampilan sosial, kita tidak hanya belajar mempraktikkannya, tetapi sebagian besar dari kita menjadi lancar dalam menafsirkan komunikasi non-verbal orang lain. Pilihan yang memiliki parafrasa yang sama adalah C. Pilihan A, B, D, dan E tidak tepat karena mengandung informasi yang tidak sesuai dengan kalimat bergaris bawah.

4. C.

Pembahasan:

JAWABAN : C

Paragraf 3 membahas tentang komunikasi non-verbal yang penting bagi kehidupan manusia dengan berbagai alasannya. Maka, jawaban yang tepat ada pada pilihan C.

5. B.

TO #4 Alphastude

Literasi Bahasa Inggris

Pembahasan:

JAWABAN : B

Pertanyaan di atas jenis soal yang menanyakan informasi spesifik yang didapat dari teks. Maka dari itu, jawaban yang tepat terletak pada pilihan B, yaitu menentukan apakah peneliti dapat menggunakan pendekatan komputasi untuk mengembangkan terapi berdasarkan pembalikan perubahan ekspresi gen yang ditemukan peneliti di ASD. Jawaban B benar karena sudah sesuai dengan paragraf yang menjelaskan mengenai gen dan pada paragraf pertama sudah disinggung mengenai tujuan peneliti yang ingin mendapatkan terapi yang efektif.

Pilihan A, tidak tepat karena dari awal sudah dijelaskan dalam tingkat molekuler. Pilihan C, tidak tepat karena bukan keterakuran yang mau diteliti lebih lanjut oleh peneliti. Pilihan D, tidak tepat karena tidak ada disinggung untuk membandingkan data penyakit Alzheimer serta penyakit Parkinson. Pilihan E, tidak tepat karena yang butuh perawatan secara efektif adalah ASD karena adanya kekurangan dalam menentukan patologi. Dengan demikian, pilihan jawaban yang tepat adalah B.

6. C.

Pembahasan:

JAWABAN : C

Pertanyaan di atas menanyakan terkait pilihan yang tidak sesuai dengan teks di atas. Maka dari itu, jawaban yang tepat terletak pada pilihan C, yaitu adanya patologi molekuler membuat penyakit parkinson atau penyakit alzheimer memiliki perawatan yang setara dengan penyaki ASD.

Pilihan A, tidak tepat karena sudah sesuai paragraf 1, kalimat 2 (1,2). Pilihan B, tidak tepat karena sudah sesuai paragraf 2, kalimat 1 (2,1). Pilihan D, tidak tepat karena sudah sesuai paragraf 2, kalimat 2 (2,2). Pilihan E, tidak tepat karena sudah sesuai paragraf 3, kalimat 1 (3,1). Dengan demikian, pilihan jawaban yang tepat adalah C.

7. E.

Pembahasan:

JAWABAN : E

Pertanyaan di atas menanyakan tentang parafrase. Maka dari itu, jawaban yang tepat terletak pada pilihan E, yaitu apakah itu area asosiasi kritis yang lebih tinggi atau area sensorik primer, studi baru menemukan perubahan di hampir semua dari 11 area kortikal yang diperiksa.

Pilihan A, tidak tepat karena terdapat tulisan *precisely* yang seharusnya *almost*. Pilihan B, tidak tepat karena terdapat tulisan *below* yang tidak sesuai dengan teks, hampir benar, namun tidak terdapat petunjuk yang jelas, lebih tepat ditulis *almost*. Pilihan C, tidak tepat terdapat tulisan *attentive* yang seharusnya *regardless*. Pilihan D, tidak tepat karena ada tulisan *previous researched* yang tidak sesuai. Dengan demikian, pilihan jawaban yang tepat adalah E.

8. D.

Pembahasan:

JAWABAN : D

Pertanyaan di atas menanyakan tentang *idea development* atau pengembangan ide. Maka dari itu, jawaban yang **tepat** terletak pada pilihan D, yaitu adanya penemuan studi baru yang menyempurnakan pemahaman ilmuwan sebelumnya sesuai dengan kalimat *refines scientists' understanding* dalam paragraf pertama.

Pilihan A, tidak tepat karena tidak dijelaskan kontradiksinya. Pilihan B, tidak tepat karena sudi yang diterbitkan betul merupakan upaya komprehensif, tetapi tidak tahu apakah ada relasi komprehensif dengan penelitian sebelumnya. Pilihan C, tidak tepat karena studi yang ditemukan bukan tentang Alzheimer dan Parkinson. Pilihan E, tidak tepat karena tidak ada tanda-tanda penulis menuliskan ADS sebagai kegawatdaruratan.

9. A.

Pembahasan:

JAWABAN : A

Informasi tentang hal yang menjadi prioritas ketika bekerja dengan cara yang cerdas secara emosional berada pada paragraf 2 kalimat 3 dan 4. Pada kalimat tersebut diinformasikan bahwa alih-alih menundukkan kepala dan memprioritaskan daftar tugas atau tujuan produktivitas, utamakan hubungan manusia dan perasaan kita sendiri dan orang lain. Maka, prioritasnya adalah hubungan manusia dan perasaan kita sendiri dan orang lain.

Pilihan yang mengandung jawaban yang tepat adalah pilihan A. Pilihan B dan C tidak tepat karena pada teks dijelaskan bahwa menundukkan kepala dan memprioritaskan daftar tugas atau tujuan produktivitas seharusnya tidak diutamakan. Pilihan D dan E tidak tepat karena teks tidak membahas hal-hal yang disebutkan sebagai prioritas atau tidak.

10. A.

Pembahasan:

JAWABAN : A

Jawaban yang tepat adalah A. Informasi tersebut dijelaskan pada paragraf kedua kalimat pertama dan kedua. Pilihan B tidak tepat karena mengandung informasi yang berkebalikan dengan yang ada pada teks. Pilihan C dan E tidak tepat karena informasi tidak dijelaskan pada teks. Pilihan D tidak tepat karena mengandung informasi yang tidak tepat mengenai manfaat yang dibawa oleh kecerdasan emosi.

11. B.

Pembahasan:

JAWABAN : B

Kalimat yang bergaris bawah bermakna bahwa pekerjaan diselesaikan melalui orang, dan jika Anda tidak dapat bekerja dengan emosi Anda sendiri dan orang lain, akan sangat sulit untuk menyelesaikan sesuatu. Pilihan yang memiliki parafrasa yang sama dengan kalimat bergaris bawah adalah pilihan B.

12. C.
