Finding Contextual Meaning

In today's fast-paced, cyber-linked world, it would be hard to imagine working without the internet. Most of us would probably feel, pretty desperate. Well, how about trying to live a day without water, a real every-day nightmare for some people. I know how it feels. After suffering from one-day emergency shutdown of my local water supply, which prevented me from getting a single drop of water from the tap, let alone, showering or just flushing the toilet, I started to think how ironic it is that on a planet where water covers 71 percent of its surface, I suddenly had no.

But when I learned that just over 2 percent of the total volume of water in the global cycle is fresh water, and that most of that is locked up as polar ice caps and in glaciers, I became horrified. Yes, horrified at the thought of more than 6 billion people sharing this small amount of water that is available. It made me wonder: is there anything I can do to use this precious resource more wisely? That question leads me to one of my favorite lines from the movie *Evan Almighty*. "How do we change the world? By doing one act of random kindness at a time". It's a message that applies to all aspects of life, including in conserving water.

So, to begin with, I started to list some of my water-consuming activities. And from various sources, I found out that taking a bath is the biggest water consumer (about 45 percent of the total daily consumption), followed by toilet flushing (25 percent) and kitchen activities (15 percent).

A survey conducted in 2006 by the Directorate of Water Development of the Public Works Ministry showed that the average daily use of fresh water in Indonesia was 144 liters per person. Based on that figure, bathing, flushing and kitchen activities represent 65, 36, and 21.5 liters respectively or 122.5 liters in total. Assuming the Indonesian population represents around 230 million people, all having equal access to 122.5 liters per day, can you imagine what happens to that 2% of global fresh water? You do the math!

Those numbers have given me a stronger urge to be more efficient with my personal consumption of fresh water. So, I started off with my bathroom. First, I readjusted the showerhead to a low-flow version and took shorter showers, less than 5 minutes long, since that could already reduce my water use approximately by half. Second, I tried a simple trick suggested by a friend to save water in the toilet tank, by placing a one-liter plastic bottle filled with water in the tank. This way, I save one liter of fresh water every time I flush the toilet. If the toilet is used 10 times a day,

I have already saved 10 liters of fresh water. And since I am not really a kitchen type of person, I believe my water consumption in that department wouldn't exceed 10 liters per day. So in total, I could save around 56.6 liters per day from bathroom and kitchen activities. Not bad for a start, as there are still more things that can be done to efficiently use water.

- Which of the following is closest in meaning to "locked up" in paragraph 2?
(A) restricted *terbatas*
(B) kept *disimpan*
(C) ~~limited~~ *terbatas*
(D) bordered *berbatasan*
(E) secured *diamankan*
- According to the passage, which of the following best describes the word "urge" in paragraph 4?
(A) want *ingin*
(B) compassion *penyakit hati*
(C) ~~desire~~ *hasrat*
(D) motivation *motivasi*
(E) aspiration *aspirasi*
- Which of the following has the same meaning as the word "exceed" in paragraph 5?

- (A) limit *batas*
- (B) rise above *diatas*
- (C) do better than *lebih baik*
- (D) overtake *melayani*
- ~~(E) go beyond~~ *melampaui*

India is often the chosen land for those searching for emotional serenity or a cure for physical ills. At one famed Indian health institute, patients have to tough it out naturally. Think of spiritual travel and India is synonymous with curative sojourns. From the ashrams nestled in the valley of the Himalayas to yoga retreats on the shore of Kamataka, the subcontinent offers myriad venues of rest and retreat, for the soul and body and for mental balance.

"Health is not something that can be purchased in a bottle," says Charakasamhita of the institute. "Diseases are a sign of the cleansing and healing effect of nature. If you suppress the conditions by drugs or by any other means, you are simply laying a foundation for chronic diseases. Drugging is like whipping an already exhausted horse." The basic belief is that our bodies are our best healers. While the institute offers some of the best massages and spa treatments in the region, the Jindal way is no stroll in the park. The institute makes for a pretty setting with benches to view the sunset over a pristine lake and lots of greenery infused with rare species of migratory birds. But in reality, it is less spa town and more boot camp.

4. The word "sojourns" in paragraph 1 can be best replaced by
 - (A) treatments *perawatan*
 - (B) trips *perjalanan*
 - (C) brief visits *kunjungan singkat*
 - ~~(D) vacations~~ *liburan*
 - (E) breaks *istirahat*
5. What does Charakasamhita mean when saying "Diseases are a sign of the cleansing and healing effect of nature" in paragraph 4?
 - (A) Your body has its own way to heal from the disease.
 - (B) Nature may heal diseases that you suffer from.
 - (C) Nature contributes a lot to the diseases that you may have..
 - (D) Diseases can cure by themselves.
 - ~~(E) When you are sick, your body is cleaning itself.~~ *menyembuhkan*
6. The word "whipping" in paragraph 2 means
 - (A) beating an animal repeatedly
 - (B) making an animal regain its strength
 - ~~(C) pushing an animal to keep moving~~ *mempaksa hewan untuk tetap bergerak*
 - (D) putting a heavy load on an animal
 - (E) diagnosing an animal's disease
7. The word "stroll" in paragraph 2 is closest in meaning to which of the following?
 - (A) run *lari*
 - ~~(B) walk unhurriedly~~ *berjalan santai*
 - (C) laze around
 - (D) sit
 - (E) rest
8. What does the author mean by "But in reality, it is less spa town and more boot camp" in paragraph 2?

lebih kenyang dengan, lebih sedikit spa kata dan lebih banyak kam pelatihan

- ☒ (A) The institute applies a tight rule for the patients.
- ☐ (B) The institute is run by military staff.
- ☐ (C) The institute only treats military officers.
- ☐ (D) The institute is a relaxing center.
- ☐ (E) The institute combines a relaxing center and a camping area.

US pop and soul music legend Stevie Wonder told diplomats from nearly 200 nations on Monday to stop squabbling over copyright and agree on a pact bringing "hope and light" to the blind people around the globe. And the singer-musician, himself sightless since just after birth, warned negotiators at the United Nations intellectual property and copyright agency WIPO that he would write a sad song about them if they didn't act on his appeal. "We must declare a state of emergency and end the information deprivation that continues to keep the visually impaired in the dark", said Wonder, whose music has won dozens of top awards in his 50-year career.

He told delegates on the opening day of WIPO's annual assembly that they should agree on an action plan that would empower the blind and near-blind by side-stepping copy-right rule and giving them access to books and learning. And the star wrapped up his 10-minutes appeal by singing to his own accompaniment famous lines from many of his best-loved songs including I Just Called to Say I Love You and Keep Our Love Alive.

9. From the term "a state of emergency" in paragraph 1, it can be inferred that it refers to a state where ...

- ☐ (A) Copy-right rules are side-stepped
- ☐ (B) Cross-borders copy-right rules cannot be overcome
- ☒ (C) WIPO members are unable to come up with a solution
- ☐ (D) Diplomats squabble over copy-right
- ☐ (E) The blinds are kept in the dark

harapan dan visi

10. It can be inferred from passage that the word "light" in the phrase "hope and light" in paragraph 1 refers to

- ☐ (A) provision of information
- ☐ (B) illumination
- ☒ (C) vision
- ☐ (D) intellectual property
- ☐ (E) Braille audio
