1	Cats also called the domestic cat or house cat (with its scientific name: <i>Felis silvestris catus</i> or <i>Felis catus</i>) is a type of carnivorous mammal of the family Felidae. The word “cat” generally refers to a “cat” that has been tamed, but can also refer to the “big cats” such as lions and tigers. Cats are considered as “perfect carnivore” with teeth and particular digestive tract. The first premolar and molar teeth form a pair of fangs on each side of the mouth that works effectively as a pair of scissors to tear the meat. Although these features also exist in the Canidae or dog, but these traits are better developed in cats. Unlike other carnivores, cats eat almost non vegetable substance. Bears and dogs sometimes eat berries, roots, or honey as a supplement, while cats only eat meat, usually freshly killed prey. In captivity, cats cannot adapt to a vegetarian diet because they cannot synthesize all the amino acids from plant material; it is in contrast with domesticated dogs, which commonly are fed a mixture of meat and vegetables and sometimes they can adapt to a completely vegetarian meal. Cats have mingled with human life since at least 6000 BC, from the skeleton of the cat found on the island of Cyprus. The ancient Egyptians of 3500 BC have used cats to keep away the rats or other rodents from the barn where the crops were saved. Currently, the cat is one of the most popular pets in the world. Cats that his lines are recorded officially as a cat breeds or pure breed are Persian, Siamese, Manx, and the Sphinx. These kinds of cat are usually bred in official captivity animal. 3	The Burj Khalifa (or how it was called until 2010, Burj Dubai) opened on January 14th, 2010. Even before the building construction was finished, starting from 2007, it had become the highest skyscraper in the world. Its exact height is 2,722 feet, or 829,8 meters, and it obviously can be seen from any point in Dubai. The number of floors, however, is a bit fewer than some might expects: Burj Khalifa totals in 163 floors, which is 16'2" (about 5 meters) for each floor. Burj Khalifa looks like a stalagmite, which means it resembles vertical minerals growing from cave floors. Stalagmites usually have a shape of a cone, and so does Burj Khalifa; if you look at it from a distance, it will remind you of a gigantic sharp cone made of glass and steel. The most impressive aspect about Burj Khalifa is that it had been planned to be a "city within the city"; this means inside the tower, you can find parks, alleys, districts, fountains, and so on. The glass of the tower's surface always shines, because it is washed every single day, and the make of concrete of which the tower was built from was invented specifically for Burj Khalifa. There are three entrances to the tower, because it is so huge that one or two would not be enough. At the foot of the skyscraper, there is a big artificial lake that measures up to 12 hectares. Inside, the building is as magnificent as it is from the outside. The interiors were projected by famous designers—for example, the interior of the Armani hotel, located on the floors from first to 39th, was designed by <u>Giorgio Armani</u> himself. The air inside Burj Khalifa is conditioned and flavored—it is said that the flavor was also designed exclusively for the tower; 57 elevators work 24 hours each day to transport visitors between floors. 10	A Career is an individual’s journey through learning, work and other aspects of life. There are a number of ways to define a career and the term is used in a variety of ways. Everybody who have career exactly want to advance their career. If you want to advance your career, you will have to make some careful decisions about which jobs you take. Consider a job offered for the value it has to your career. It may mean sacrifices at first. You may have to move to a different region or country to get a job that is right for you. You may have to work late hours, at least temporarily. You might even have to take a lower salary for a job that offers you the experience that you need. But you should never accept a job if it is not related to <u>your</u> career goals. Accepting a job that is not within your career path will not give you the skill or experience you need or want. You will find yourself frustrated in such a position and consequently will not perform your best. This will have an effect on the people around you, who will not feel as if you are being part of the team. The best advice is to think carefully before accepting any position and make sure that the job is one you to have. 11	One of the modern world's intriguing sources of mystery has been aeroplanes vanishing in mid flight. One of the more famous of these was the disappearance in 1937 of a pioneer woman aviator, Amelia Earhart. On the second last stage of an attempted round the world flight, she had radioed her position as she and her navigator searched desperately for their destination, a tiny island in the Pacific. The plane never arrived at Howland Island. Did it crash and sink after running out of fuel? It had been a long haul from New Guinea, a twenty hour flight covering some four thousand kilometres. Did Earhart have enough fuel to set down on some other island on her radioed course? Or did she end up somewhere else altogether? One fanciful theory had her being captured by the Japanese in the Marshall Islands and later executed as an American spy; another had her living out her days under an assumed name as a housewife in New Jersey. Seventy years after Earhart's disappearance, 'myth busters' continue to search for her. She was the best-known American woman pilot in the world. People were tracking her flight with great interest when, suddenly, she vanished into thin air. Aircraft had developed rapidly in sophistication after World War One, with the 1920 s and 1930 s marked by an aeronautical record-setting frenzy. Conquest of the air had become a global obsession. While Earhart was making headlines with her solo flights, other aviators like high-altitude pioneer Wiley Post and industrialist Howard Hughes were grabbing some glory of their own. But only Earhart, the reserved tomboy from Kansas who disappeared three weeks shy of her 40 th birthday, still grips the public imagination. Her disappearance has been the subject of at least fifty books, countless magazine and newspaper articles, and TV documentaries. It is seen by journalists as the last great American mystery. The Coast Guard and later the Navy, believing the distress calls were real, adjusted their searches, and newspapers at the time reported Earhart and her navigator were marooned on an island. No-one was able to trace the calls at the time, so whether Earhart was on land in the Phoenix Islands or there was a hoaxer in the Phoenix Islands using her radio remains a mystery. Others dismiss the radio calls as bogus and insist Earhart and her navigator ditched in the water. An Earhart researcher, Elgen Long, claims that Earhart's airplane ran out of gas within fifty-two miles of the island and is sitting somewhere in a 6,000-square-mile area, at a depth of 17,000 feet. At that depth, the fuselage would still be in shiny, pristine condition if ever anyone were able to locate it. It would not even be covered in a layer of silt. Those who subscribe to this explanation claim that fuel calculations, radio calls and other considerations all show that the plane plunged into the sea somewhere off Howland Island. Whatever the explanation, the prospect of finding the remains is unsettling to many. To recover skeletal remains or personal effects would be a grisly experience and an intrusion. They want to know where Amelia Earhart is, but that's as far as they would like to go. As one investigator has put it, "I'm convinced that the mystery is part of what keeps us interested. thought to comprise the aboriginal population in Canada. But this decision has placed on provincial courts the enormous burden of interpreting and translating the necessarily general constitutional language into specific rulings. The result has been inconsistent recognition and establishment of aboriginal rights, despite the continued efforts of aboriginal peoples to raise issues concerning their rights. Aboriginal rights in Canada are defined by the constitution as aboriginal peoples' rights to ownership of land and its resources, the inherent right of aboriginal societies to self-government, and the right to legal recognition of indigenous customs. But difficulties arise in applying these broadly conceived rights. For example, while it might appear straightforward to affirm legal recognition of indigenous customs, the exact legal meaning of "indigenous" is extremely difficult to interpret. The intent of the constitutional protection is to recognize only long-standing traditional customs, not those of recent origin; provincial courts therefore require aboriginal peoples to provide legal documentation that any customs they seek to protect were practiced sufficiently long ago—a criterion defined in practice to mean prior to the establishment of British sovereignty over the specific territory. However, this requirement makes it difficult for aboriginal societies, which often relied on oral tradition rather than written records, to support their claims. Furthermore, even if aboriginal peoples are successful in convincing the courts that specific rights should be recognized, it is frequently difficult to determine exactly what these rights amount to. Consider aboriginal land claims. Even when aboriginal ownership of specific lands is fully established, there remains the problem of interpreting the meaning of that "ownership." In a 1984 case in Ontario, an aboriginal group claimed that its property rights should be interpreted as full ownership in the contemporary sense of private property, which allows for the sale of the land or its resources. But the provincial court instead ruled that the law had previously recognized only the aboriginal right to use the land and therefore granted property rights so minimal as to allow only the bare survival of the	dengan kalimat 5 paragraf 3 yang menyebutkan: <i>"But the provincial court instead ruled that the law had previously recognized only the aboriginal right to use the land and therefore granted property rights so minimal as to allow only the bare survival of the community"</i> Di poin ini menyatakan bahwa hak suku aborigin atas tanahnya sangat minim dan diperbolehkan hanya untuk kelangsungan hidup komunitas. But this decision has placed on provincial courts the enormous burden of interpreting and translating the necessarily general constitutional language into specific rulings. The result has been inconsistent recognition and establishment of aboriginal rights, despite the continued efforts of aboriginal peoples to raise issues concerning their rights. Aboriginal rights in Canada are defined by the constitution as aboriginal peoples' rights to ownership of land and its resources, the inherent right of aboriginal societies to selfgovernment, and the right to legal recognition of indigenous customs. But difficulties arise in applying these broadly conceived rights. For example, while it might appear straightforward to affirm legal recognition of indigenous customs, the exact legal meaning of "indigenous" is extremely difficult to interpret. The intent of the constitutional protection is to recognize only long-standing traditional customs, not those of recent origin; provincial courts therefore require aboriginal peoples to provide legal documentation that any customs they seek to protect were practiced sufficiently long ago-a criterion defined in practice to mean prior to the establishment of British sovereignty over the specific territory. However, this requirement makes it difficult for aboriginal societies,	Pembahasan : E. Aboriginal peoples	E

	which often relied on oral tradition rather than written records, to support their claims. ".... that any customs they seek to protect were practiced sufficiently long ago." 16	Before the grass has thickened on the roadside verges and leaves have started growing on the trees is a perfect time to look around and see just how dirty Britain has become. The pavements are stained with chewing gum that has been spat out and the gutters are full of discarded fast food cartons. Years ago I remember travelling abroad and being saddened by the plastic bags, discarded bottles and soiled nappies at the edge of every road. Nowadays, Britain seems to look at least as bad. What has gone wrong? The problem is that the rubbish created by our increasingly mobile lives lasts a lot longer than before. If it is not cleared up and properly thrown away, it stays in the undergrowth for years; a semi-permanent reminder of what a tatty little country we have now. Firstly, it is estimated that 10 billion plastic bags have been given to shoppers. These will take anything from 100 to 1,000 years to rot. However, it is not as if there is no solution to this. A few years ago, the Irish government introduced a tax on non-recyclable carrier bags and in three months reduced their use by 90%. When he was a minister, Michael Meacher attempted to introduce a similar arrangement in Britain. The plastics industry protested, of course. However, they need not have bothered; the idea was killed before it could draw breath, leaving supermarkets free to give away plastic bags. What is clearly necessary right now is some sort of combined initiative, both individual and collective,	Jawaban = A Karena kata tatty pada kalimat ini "a semi-permanent reminder of what a tatty little country we have now" memiliki arti kumuh. Maka jawaban yang paling dekat atau menjadi sinonim untuk kata bind adalah A = Seedy yang berarti lusuh / kumuh. B. Wrong : salah C. Ugly : Jelek D. Stingy : Serakah E. Greasy : Berminyak	A
