

Pengetahuan dan Pemahaman Umum (25 menit)

Bacaan 1

(1) Pemerintah melalui Kementerian Ketenagakerjaan (Kemenaker) menegaskan, tidak benar *Omnibus Law* bakal menghilangkan upah minimum dan sejumlah hak lainnya, seperti cuti, hak perlindungan, dan jam kerja. (2) Direktorat Jenderal Pembinaan Hubungan Industrial dan Jaminan Sosial Tenaga Kerja (Ditjen PHI JSK) Kemenaker, Haiyani Rumondang, menerangkan, hal itu dalam IDX Economic Forum hari ini.

(3) "Isu penghapusan upah minimum dan sejumlah hak pekerja dalam *Omnibus Law* itu tidak benar," ujar Haiyani di Jakarta, Senin (24/2/2020).

(4) Lebih lanjut, Ia menjelaskan bahwa upah minimum tidaklah dihilangkan, tetapi ada upah provinsi. (5) Selain itu, terdapat penyederhanaan Undang-undang (UU) terkait pembiayaan upah dan cuti. (6) "Jadi bukan dihilangkan. Kami buat penyederhanaan, jam kerja pun nanti disesuaikan," ungkap nya.

Bacalah tulisan di atas, kemudian jawablah soal-soal yang tersedia dengan memilih jawaban yang tepat di antara pilihan jawaban A, B, C, D, atau E.

56. Kesalahan penggunaan tanda baca TIDAK terdapat pada

- (A) kalimat (1)
- (B) kalimat (2)
- (C) kalimat (3)
- (D) kalimat (4)
- (E) kalimat (6)

57. Kesalahan penulisan huruf kapital TIDAK ditemukan pada

- (A) kalimat (1)
- (B) kalimat (3)
- (C) kalimat (4)
- (D) kalimat (5)
- (E) kalimat (6)

58. Simpulan Bacaan 1 di atas adalah

- (A) Ada isu penghilangan upah minimum dalam *omnibus law*.
- (B) Haiyani berpandangan bahwa rencana penghapusan upah minimum dan sejumlah hak pekerja dalam *omnibus law* itu kurang tepat.
- (C) Haiyani mengatakan bahwa penghapusan upah minimum dan sejumlah hak pekerja dalam *Omnibus Law* itu tidak benar.
- (D) Selain penghapusan upah minimum dan sejumlah hak pekerja dalam *omnibus law*, terdapat juga isu penyederhanaan undang-undang (UU) terkait pembiayaan upah dan cuti.
- (E) Direktorat Jenderal Pembinaan Hubungan Industrial dan Jaminan Sosial Tenaga Kerja (Ditjen PHI JSK) Kemenaker, Haiyani Rumondang, menerangkan sekitar isu penghapusan upah minimum dan sejumlah hak pekerja dalam *Omnibus Law* hal dalam IDX Economic Forum.

59. Melalui Bacaan 1 di atas, penulis ... tanggapan sekitar isu penghapusan upah minimum dan sejumlah hak pekerja dalam *omnibus law*.

Kata yang TEPAT mengisi elipsis di atas adalah

- (A) mengisahkan
- (B) menegaskan
- (C) membuktikan
- (D) memaparkan
- (E) menggambarkan

Bacaan (2)

(1) Selain musim kemarau tahun ini, saya masih ingat di tahun 2015. (2) Kala itu, saya masih seorang mahasiswi, sedang menempuh perjalanan pulang kampung. (3) Dengan menggunakan moda transportasi kereta api, dari Stasiun Pasar Senin hingga Stasiun Banyuwangi dan menyeberangi Selat Bali, ingin menengok keluarga. (4) Perjalanan yang membuat hati saya takut untuk mengalaminya kembali. (5) Sepanjang perjalanan, kereta api tidak hanya melewati area pemukiman warga, jalur kereta api, tetapi juga melewati luasnya sawah dan jembatan penghubung sungai kecil dan besar. (6) Namun, di sepanjang Jawa Barat hingga memasuki wilayah Jawa Timur, ada pemandangan yang asing. (7) Pertama kalinya saya melihat sawah-sawah bagaikan gurun, sungai-sungai mengering, dan retakan-retakan tanah tertindih daun-daun yang mengering.

(8) Pada saat itu, pemberitaan juga ramai menjelaskan bagaimana para warga kesulitan air untuk kebutuhan sehari-hari. (9) Setiap hari mereka bergelut dengan panasnya suhu musim panas, tidak bisa mandi, dan keringat-keringat dalam jumlah banyak. (10) Belum lagi balita-balita yang menangis, kekebalan tubuhnya tidak mampu untuk melawan ekstrimnya cuaca. (11) Bahan makanan menipis, penyakit-penyakit mulai bermunculan, dan binatang ternak warga satu per satu mengalami kematian. (12) Bahkan, para penggembala merelakan gembala mereka dijual dengan harga yang amat murah. (13) Emosi saya rasanya meluap-luap, utamanya kepada rakyat kecil. (14) Sungguh menderitanya mereka.

Bacalah tulisan di atas, kemudian jawablah soal-soal yang tersedia dengan memilih jawaban yang tepat di antara pilihan jawaban A, B, C, D, atau E.

60. Bacaan 2 di atas merupakan
- (A) sanggahan penulis tentang peristiwa kemarau yang merisaukannya
 - (B) ungkapan perasaan penulis tentang peristiwa kemarau yang merisaukannya
 - (C) gambaran penulis tentang peristiwa kemarau yang merisaukannya
 - (D) kisah penulis tentang peristiwa kemarau yang merisaukannya
 - (E) pembuktian penulis tentang peristiwa kemarau yang merisaukannya
61. Kata *Emosi* pada kalimat (13) PALING MUNGKIN berpadanan makna dengan
- (A) luapan kemarahan
 - (B) luapan kejengkelan
 - (C) luapan perasaan
 - (D) luapan keberanian
 - (E) luapan kecintaan
62. Kata-kata berikut ini membuat kalimat yang ditempatinya TIDAK baku, KECUALI....
- (A) *di* pada kalimat (1)
 - (B) *menengok* pada kalimat (3)
 - (C) *pemukiman* pada kalimat (5)
 - (D) *ekstrimnya* pada kalimat (10)
 - (E) *meluap-luap* pada kalimat (13)
63. Relasi *penegas* terdapat pada
- (A) kalimat (5)
 - (B) kalimat (6)
 - (C) kalimat (8)
 - (D) kalimat (11)
 - (E) kalimat (12)

Bacaan 3

(1) Daya tarik untuk berinvestasi di pasar modal, khususnya di lantai Bursa Efek, masih sangat tinggi. (2) Bukan hanya karena kemungkinan mendapatkan *capital gain* yang tinggi, tetapi juga karena waktunya bisa sangat cepat dalam setiap sesi perdagangan bila anda memilih menjadi seorang trading.

(3) Kemudian, sudah banyak kisah orang yang sangat sukses dan berhasil menjadi kaya, bahkan kaya raya, dengan menekuni investasi di pasar modal. (4) Dengan kejelian, ketelitian serta kehati-hatian yang tinggi, maka peluang untuk mendulang untung besar sangat mungkin menjadi kenyataan.

(5) Kecenderungan yang ada memperlihatkan bahwa minat masyarakat Indonesia untuk berinvestasi di pasar modal semakin meningkat dari waktu ke waktu, terutama investor individual. (6) Baik sebagai investor maupun sebagai trader.

Diadaptasi dengan pengubahan dari <https://www.kompasiana.com>.

Bacalah tulisan di atas, kemudian jawablah soal-soal yang tersedia dengan memilih jawaban yang tepat di antara pilihan jawaban A, B, C, D, atau E.

64. Kesalahan penulisan ditunjukkan pada kata berikut,KECUALI pada
 (A) *berinvestasi* pada kalimat (1)
 (B) *capital gain* pada kalimat (2)
 (C) *anda* pada kalimat (2)
 (D) *trading* pada kalimat (2)
 (E) *trader* pada kalimat (6)
65. Gagasan inti Bacaan 3 di atas terletak pada
 (A) kalimat (1)
 (B) kalimat (2)
 (C) kalimat (3)
 (D) kalimat (4)
 (E) kalimat (5)
66. Manakah pernyataan yang TEPAT berdasarkan isi Bacaan 3 di atas?
 (A) Waktu bisa sangat cepat memilih menjadi seorang *trading* dalam setiap sesi perdagangan merupakan daya tarik untuk berinvestasi di pasar modal.
 (B) Banyak sekali orang kaya, bahkan kaya raya, dengan hanya menekuni investasi di pasar modal.
 (C) Kecenderungan masyarakat Indonesia berinvestasi di pasar modal semakin meningkat dari waktu ke waktu disebabkan untung besar yang akan menjadi kenyataan.
 (D) Dengan kejelian, ketelitian serta kehati-hatian yang tinggi, peluang untuk mendulang untung besar akan menjadi kenyataan.
 (E) Baik sebagai investor maupun sebagai trader, sama-sama memberi peluang untuk mendulang untung besar.
67. Berdasarkan isi Bacaan 3 di atas, seseorang tertarik berinvestasi di pasar modal, khususnya di lantai Bursa Efek, PALING MUNGKIN disebabkan hal berikut,KECUALI....
 (A) kemungkinan mendapatkan *capital gain* yang tinggi
 (B) waktunya bisa sangat cepat dalam setiap sesi perdagangan bila memilih menjadi seorang *trading*
 (C) peluang untuk mendulang untung besar sangat mungkin menjadi kenyataan
 (D) sudah banyak kisah orang yang sangat sukses dan berhasil menjadi kaya, bahkan kaya raya
 (E) mudahnya menjadi sebagai seorang *trader*

The most thoroughly studied cases of deception strategies employed by ground nesting birds involve plovers, small birds that typically nest on beaches or in open fields, their nest merely scrapes in the sand or earth. Plovers also have an effective repertoire of tricks for distracting potential nest predators from their exposed or defenseless eggs or chicks. The ever-watchful plover can detect a possible threat at a considerable distance. When she does, the nesting bird moves inconspicuously off the nest to a spot well away from eggs or chicks. At this point she may use one of several ploys. One technique involves first moving quietly toward an approaching animal and then setting off noisily through the grass or brush in a low, crouching run away from the nest, while emitting rodent like squeaks.

The effect mimics scurrying mouse or vole, and the behavior rivets the attention of the type of predators that would also be interested in eggs and chicks. Another deception begins with quiet movement to an exposed and visible location well away from the nest. Once there, the bird pretends to incubate a brood. When the predator approaches, the parent flees, leaving the false nest to be searched. The direction in which the plover "escapes" is such that if the predator chooses to follow, it will be led still further away from the true nest.

The plovers' most famous strategy is the broken wing display, actually a continuum of injury-mimicking behaviors spanning the range from slight disability to near complete helplessness. One or both wings are held in an abnormal position, suggesting injury. The bird appears to be attempting escape along an irregular route that indicates panic. In the most extreme version of the display, the bird flaps one wing in an apparent attempt to take to the air, flops over helplessly, struggles back to its feet, runs away a short distance, seemingly attempts once more to take off, flops over again as the "useless" wing fails to provide any lift, and so on. Few predators fail to pursue such obviously vulnerable prey. Needless to say, each short run between "flight attempts" is directly away from the nest.

68. Which of the following best describes the organization of the passage?
- (A) A description of the sequence of steps involved in plovers nest building.
 - (B) A generalization about plover behavior followed by specific examples.
 - (C) A comparison and contrast of the nesting behavior of plovers and other ground nesting birds.
 - (D) A cause and effect analysis of the relationship between a prey and a predator.
 - (E) A study about the nest building techniques of plovers
69. Which of the following is mentioned in the passage about plovers?
- (A) Their eggs and chicks are difficult to find.
 - (B) They are generally defenseless when away from their nests.
 - (C) They are slow to react in dangerous situations.
 - (D) They are pretending to search of prey.
 - (E) Their nests are on the surface of the ground
70. In the deception of techniques described in paragraph 2. The plover tries to ...
- (A) stay close to her nest.
 - (B) warn other plovers of danger.
 - (C) attract the predator's attention.
 - (D) appear to be injured.
 - (E) frighten the approaching predator.
71. Based on paragraph 3 which of the following aspects of the plover's behavior gives the appearance that it is frightened?
- (A) Abnormal body position.
 - (B) Irregular escape route.
 - (C) Unnatural wing movement.
 - (D) Unusual amount of time away from the nest.
 - (E) Sounding like another animal.

The interrelationship of science, technology, and industry is taken for granted today—summed up, not altogether accurately, as “research and development.” Yet historically this widespread faith in the economic virtues of science is a relatively recent phenomenon, dating back in the United States about 150 years, and in the western world as a whole not over 300 years at most. Even in this current era of large scale intensive research and development, the interrelationship involved in this process are frequently misunderstood. Until the coming of the Industrial Revolution, science and technology evolved for the most part independently of each other. Then as industrialization became increasingly complicated, the craft techniques of preindustrial society gradually gave way to a technology based on the systematic application of scientific knowledge and scientific methods. This changeover started slowly and progressed unevenly. Until late the nineteenth century, only a few industries could use scientific techniques or cared about using them. The list expanded noticeably after 1870, but even then much of what passed for the application of science was “engineering science” rather than basic science.

Nevertheless, by the middle of the nineteenth century, the rapid expansion of scientific knowledge and of public awareness if not understanding of it had created a belief that the advance of science would in some unspecified manner automatically generate economic benefits. The widespread and usually uncritical acceptance of this thesis led in turn to the assumption that the application of science to industrial purposes was a linear process, starting with fundamental science, then proceeding to applied science or technology, and through them to industrial use. This is probably the most common pattern, but it is not invariable. New areas of science have been opened up and fundamental discoveries made as a result of attempts to solve a specific technical or economic problem. Conversely, scientists who mainly do basic research also serve as consultants on projects that apply research in practical ways.

In sum, the science technology industry relationship may flow in several different ways, and the particular channel it would follow depends on the individual situation. It may at times even be multidirectional.

72. What is the author main purpose in the passage?
- (A) To show how technology influenced basic science.
 - (B) To describe the scientific base of nineteenth century American industries.
 - (C) To tell the readers about changes brought by technology.
 - (D) To correct misunderstandings about the connections between science, technology, and industry.
 - (E) To argue that basic science has no practical application.
73. The understanding of research and development in the middle nineteenth century is based on which of the following?
- (A) The needs of upgrading application of engineering science.
 - (B) Engineering science is not very important.
 - (C) Fundamental science naturally leads to economic benefits.
 - (D) The relationship between research and development should be criticized.
 - (E) Industrial needs should determine what areas fundamental science focuses on.
74. Why does the author mention “consultants” in the last sentence of paragraph 2?
- (A) To show how new areas of science have given rise to new professions.
 - (B) To distinguish between scientists who work in industry and those who do not.
 - (C) To explain the ways in which scientists find financial support for their work.
 - (D) To show how scientists who work in basic research contribute to applied science.
 - (E) To tell some important reader that used scientific technique.
75. Which of the following statements does the passage support?
- (A) The development of science and of industry is now interdependent.
 - (B) Basic scientific research cannot generate practical applications.
 - (C) Industries should spend less money on research and development.
 - (D) Science and technology are becoming more separate.
 - (E) The interrelation among science, technology and industries is hardly true.
